Calgary, Alberta, Canada

SKILLS

- **Computer Science**
 - **Flutter/Dart:** Used to create cross-platform apps for Android, Linux and Web
 - **Python:** Used to develop 16 projects involving various APIs, packages, and frameworks; currently exploring Django
 - **Git/GitHub:** Used to version-control and document personal projects; maintain and host personal website
- **Information Systems/Technology**
 - **Docker:** used both for testing and shipping self-made projects, as well as using docker-compose specifically for server environments
 - **Linux:** used in both server and PC environments; daily-driving Fedora KDE

PROJECTS

- **Computer Science**
 - **Flutterfin, 2025-2026**
 - Comprehensive Jellyfin client made in Flutter/Dart, built for Android, Linux and Web (Flutter JS)
 - Supports subtitles, multiple video/audio tracks, downloads, search, admin dashboard, user customization, multiple servers
 - **rembg-flutter/rembg-gui:** Background removal apps for images, with features like copying/saving images, and setting customization
 - **Miscellaneous Python projects**
 - Around 16 Python projects that experiment with different APIs and packages
 - Various styles of projects, such as CLI apps, discord bots, web apps
 - Some apps have been containerized and are available in Docker Hub
- **Information Systems/Technology**
 - **Home Server, 2024-2025**
 - Repurposed a Dell laptop as a home server, with many variations of the home server in different Linux distributions

- Various use of Docker, sometimes up to 15 containers, examples being: self-hosted media library on Jellyfin, password manager with Vaultwarden, Home-wide DNS server with Pi-Hole
- Implemented encrypted backups that were successfully restored following 2 hardware failures
- Ran under Nginx Proxy Manager, connected to Cloudflare's tunnel proxying for some apps, most services had their own domain
- Configured SSH Restrictions, firewall rules (ufw), backups, monitoring (Uptime Kuma and Gotify), and automatic updates
- **Virtual Private Server, 2025-Present**
 - Currently managing a VPS on IONOS's platform for \$6/month, which hosts services from the home server, using the aforementioned backups
 - Configured SSH Restrictions, Monitoring (Uptime Kuma), Reverse Proxying (Nginx Proxy Manager + Cloudflare)

EDUCATION

- **Henry Wise Wood High School, Calgary, Alberta**
2026-Present
High school diploma
Expected to graduate in 2029

HOBBIES

- **Online Surveys (Five Surveys)**
 - Used online app, Five Surveys, to do online surveys for money
