

Puneet Deol

+1 368-338-4379, pd4500@protonmail.com

Calgary, Alberta, Canada

SKILLS

- **Computer Science**
 - **Flutter/Dart:** Used to make multiple apps for Android and Linux
 - **Python:** Used to make multiple GUI apps, and other beginner-level projects. Currently experimenting with Django
- **Information Systems/Technology**
 - **Docker:** used as a major part of home server and VPS projects
 - **Linux:** used in both server and PC environments, daily-driving Fedora KDE

PROJECTS

- **Computer Science**
 - **Flutterfin, 2025-2026**
 - Comprehensive Jellyfin client made in Flutter/Dart, confirmed working on Android, Linux and Web (Flutter JS)
 - Supports subtitles, multiple video/audio tracks, downloads, basic search, admin dashboard, user customization, multiple servers, .etc
 - **rembg-flutter/rembg-gtk:** 2 similar apps made in 2 different frameworks, used for background removal on images with some extra features
 - **Extra Python projects**
 - Many beginner Python projects that are not worth their own inclusion
 - Various styles of projects, such as CLI apps, discord bots, web apps, .etc
 - Some apps have been containerized and were temporarily used in home server
- **Information Systems/Technology**
 - **Home Server, 2024-2025**
 - Used an old Dell laptop as a home server, with many variations of the home server in different Linux distributions

- Various use of Docker, sometimes up to 15 containers, examples being: self-hosted media library on Jellyfin, password manager with Vaultwarden, Home-wide DNS server with Pi-Hole, .etc
- Has failed 2 times (hardware failure), and in both times had successful encrypted backups from Backblaze B3's free plan, that were sent via the Duplicati app in Docker
- Ran under Nginx Proxy Manager, connected to Cloudflare's tunnel proxying for some apps, most services had their own domain
- Configured Safe SSH access, firewall rules (ufw), backups, monitoring (Uptime Kuma and Gotify), and automatic updates
- **Virtual Private Server, 2025-Present**
 - Currently managing a VPS on IONOS's platform for \$6/month, which hosts some services that used to be on the home server
 - Configured safe SSH rules, Monitoring (Uptime Kuma), Reverse Proxying (Nginx Proxy Manager + Cloudflare), .etc

EDUCATION

- **Henry Wise Wood High School, Calgary, Alberta**
2026-Present
High school diploma
Expected to graduate in 2029

HOBBIES

- **Online Surveys (Five Surveys)**
 - Used online app, Five Surveys, to do online surveys for money (a dollar per survey)
 - Allowed to pay for VPS
- **Home Servers/Homelabbing**
 - Using physical hardware or IaaS to create servers for personal use
 - Mentioned in further detail above
- **Software Development**
 - Building apps/projects with select programming languages/tools
 - Mentioned in further detail above
